

What some people have said about The Money Secret Course:

"Not just a book on debt, but on life choices. This is unmissable."

Antony Elliot, Former Chief Risk Officer, Abbey National plc.

"We thought we had our money problem sorted, but this book revealed even more ways that we could manage our meagre finances better. So easy to understand, too!"

DC&AC

"Absolutely brilliant."

Keith Tondeur, National Director, Credit Action

"I think it should be given to every school leaver/student at the start of their earning capabilities to set them on the right track."

CT

"Reading the first few pages of The Money Secret really gave me the appetite to read on to find out how it could offer hope to those who find themselves in debt and unable to cope."

LD

"By reading The Money Secret and doing Cash For a Month I have at last started to be in control of my money. I had not realised until now that it was the use of the debit card that began to spiral my finances out of control. Now we draw the cash out and when it's gone, it's gone. It's weird - it suddenly feels as if I've got lots of money to spend again because I can see it. I'm spending a lot less, but it feels like I'm spending more."

Mandy

"The small changes I've made to my spending habits will add up to a significant change to my bank balance!"
